The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/564,781	<b>Applicant(s)</b> KING, SCOTT	
	<b>Examiner</b> Louis M. Arana	<b>Art Unit</b> 2831	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because the abstract provided is that of the corresponding PCT application and it does not conform to US practice.

Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Dumoulin et al. P.N. 6,914, 432 (Dumoulin).

Dumoulin discloses a coil array for Magnetic Resonance Imaging. Applicant's attention is directed to Fig. 2 and corresponding description. The claims at issue are anticipated by the combination of coils 62 and 66. The correspondence between the various coil elements is as follows. First and second coil elements correspond to the clockwise and counterclockwise loops of coil 62 respectively. The two loops define a transverse line in the vertical direction of the page. The third coil element is identified as coil 66 and has first, second and third coil sections. The first coil section is the center counterclockwise

section that bridges the transverse line. The second and third coil sections correspond to the left and right clockwise loops. The second and third coil sections are twisted with respect to the first coil section and carry currents in directions opposite thereto.

Dumoulin meets all the limitations of the claims at issue.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chu et al., Hagen et al., Lu, Wang and Boskamp all disclose coil arrays for MRI containing "butterfly" coils. Note the abstract of each disclosure. Note in particular Chu's Fig. 3 and Boskamp's Fig. 2b.
